Effective ways to make place into a living place

Construction has been a critical part of human civilization, providing us with homes, schools, hospitals, roads, bridges, and other essential infrastructure that we use every day. Moreover, construction is essential for enhancing the quality of life for communities by providing safe and comfortable places to live and work. Buildings are not just structures that we inhabit, but they are also spaces that shape our behavior and experiences. For instance, a well-designed building can enhance productivity and creativity in the workplace, promote relaxation in health care facilities, and create a sense of community in residential areas.

Construction is also vital for sustainable development. Green build practices and sustainable construction materials can help reduce energy consumption water usage, and waste, there by mitigating the negative impact of buildings on the environment.

In conclusion, Construction plays a crucial role in our lives, providing us with the infrastructure and buildings that we need to live, work, and thrive. It is a vital industry that supports our economy, provides employment opportunities, and contributes to the wellbeing of communities. Therefore, we should value and invest in the construction industry to ensure that it continues to provide us with safe, sustainable, and comfortable places to live and work.

Construction has changed people around the world. We SANCO proudly part of this process of converting world into a better living place.

About Us

*SANCO Contracting is a dynamic developing company with expanding interests in commercial and residential projects. We provide our expertise to the significance of location in making decisions to build and restore. Therefore, as an emerging company. **We are focusing on variety of projects especially interior contracting and single source manufacturing as well as adopting the new technologies to digitalize the kingdom.***

Engaging with architects and consultants of international repute, we assure enhancing our standard and making it to the level of customer satisfaction. Standing us in good stead in these endeavors our unwavering commitment of delivering nothing less than the very best in terms of both quality and Value.

SANCO contracting setup its business in 2008 with strong focus in commercial and industrial sector.

Since then, we become well established in General contracting and commercial fit-out works. In the past, we have provided project management services for several clients. We have the aim to provide our clients with reliable solutions to their most complex challenges. We were first established in the mid-eighties under the name of the Shamrani Est.

After working for a long time of 27 years under the name then we decided to set-up our own construction and contracting firm so that is why SANCO was officially established as a separate entity in the year of 2008.

We are still relatively young players of our industry but conduct ourselves as if we are a global leader.

We have experience and can provide the highest quality results on schedule and in budget.

Our clients value our dedication, innovation, sustainability, safety, our responsiveness and devotion to customer service.

Best

SANCO prides itself on having a motivated and capable team to manage challenging projects across varied commercial and residential Sectors. Individual goals and teamwork combine to make each unique project successful. We strive hard to deliver win-win strategies for our clients by providing unparalleled professional services.

SANCO Studio

Mobile Apps Services

We specialize in creating high-quality, user-friendly, and innovative mobile applications for various platforms and industries. We have a team of experienced and skilled developers, designers, testers, and project managers who can handle any mobile app project (including Apps and Games) from concept to launch and beyond.

Android app development: We use Kotlin, Java, Android Studio, Firebase, Google Cloud Services and other technologies to create native Android apps for smartphones, tablets, wearables and TV.

iOS app development: We use Swift, Objective-C, SwiftUI, CocoaPods, RxSwift, SwiftLint, CircleCI and other technologies to create native iOS apps for iPhone, iPad, Apple Watch, Apple TV.

Cross-platform app development: We use Unity, Flutter, React Native, AWS Services and other technologies to create cross-platform apps and games that run on both iOS and Android devices with a single codebase.

Mobile app design: We use Adobe Photoshop, Adobe Illustrator, Figma, Adobe XD and other tools to create stunning and intuitive mobile app designs that follow the best practices of UI/UX.

Mobile app testing: We use Firebase Test Lab, Crashlytics, Bugsnag, Game Analytics and other tools to perform manual and automated testing of mobile apps on various devices and platforms.
